WASHINGTON STATE

Today's presentation

- Overview
- Frequently asked questions from employers
- SOC code resources
- Questions and answers
 - Download today's presentation at esd.wa.gov/employer-taxes/about-soc
 - Can ask questions via text in chat any time
 - We will be recording this session and posting on our website
 - This slide deck will be shared on esd.wa.gov

What is it?

- Standard Occupational Classification (SOC) is a federal coding system used to identify occupations and workers.
- Data is used to analyze workforce demand and evaluate the effectiveness of training programs.

History

- Stemmed from the recommendation by Future of Work Task Force in 2019.
- Washington State House Bill 2308 – SOC codes implemented into quarterly tax reports.
- In addition, Washington is following in the footsteps of other states, including Alaska, Indiana and Louisiana.

What do SOC codes provide?

- SOC codes help government agencies and private businesses compare occupational data.
- This data is used by:
 - Government program managers.
 - Industry and labor relations specialists.
 - Students considering career training.
 - Job seekers.
 - Vocational training schools.
 - Employers wishing to set salaries or locate a new business.

What do SOC codes provide?

- Occupational data from SOC codes fills a critical employee data gap across the state. In the future, SOC codes:
 - Could help students, families, taxpayers and policymakers see whether graduates land jobs in the careers for which they trained.
 - Could help shed light on training for specific jobs and careers, and whether that training is effective.
 - Could help guide students on career choices and allow businesses to help shape courses that lead to actual jobs.
 - Could help economic developers identify the strengths of local workforces and help attract businesses to those communities.

Timeline

Starting Nov. 15, 2021:

- Customers using our newer version of EAMS can look up SOC codes.

Dec. 1, 2021, through third quarter 2022:

- Continue using EAMS to submit your quarterly reports.
- Customers using our newer version of EAMS can use the new SOC code lookup tool to find the most accurate codes for each of your employees.
- Starting in mid-2022, customers will be upgraded to the newer version of EAMS, which can remember the SOC codes you entered last quarter.

Starting fourth quarter 2022:

- All employers required to report SOC codes.

Frequently asked questions

1. How can I prepare before I use SOC codes?

Answer: We recommend **creating a spreadsheet listing** each employee and their job title.

Using the look up tool available on our website www.onetcodeconnector.org, look up each job title and enter the first six numbers of the SOC code on your spreadsheet that's the closest match for that specific job.

You can use this reference when you complete your information for filing. We recommend importing your wage file instead of hand-keying it. For more info, see esd.wa.gov/employer-taxes/importing-wage-files-new-EAMS.

Frequently asked questions

■ 2. When are SOC codes required?

Answer: They are required when you report fourth quarter of 2022 taxes in January 2023.

■ 3. Do I have to report SOC codes if I'm a reimbursable employer?

Answer: Yes. Reimbursable employers are required to submit quarterly reports the same as taxable employers, and those reports are required to include SOC codes.

Frequently asked questions

■ 4. Do I have to re-enter SOC codes every quarter?

Answer: Currently, employers will have to re-enter SOC codes every quarter with the submission of your quarterly tax and wage reporting.

ESD is building within the Unemployment Insurance (UI) Tax quarterly reporting system a way to capture SOC codes for employees that were entered in the previous quarter so employers will not have to re-enter SOC codes every quarter.

However, if an employee changes occupations from the previous quarter, we still want to capture the most recent occupation of the employee from the employer.

Frequently asked questions

■ 5. How do I decide which SOC code to use for an employee who performs multiple job functions or has multiple duties?

Answer: An occupation that combines two different activities is reported with the code for the occupation that requires the highest level of skill or education.

If the skill levels are the same, report the occupation in which the employee spends the most time. For employees who change jobs during the quarter because of transfers, promotions, demotions, or reclassifications, report only their last occupation. For more info:

www.bls.gov/soc/2018/soc_2018_class_prin_cod_guide.pdf

Frequently asked questions

■ 6. When will paper forms be updated to include SOC code information?

Answer: Paper forms are being updated now and will be mailed to employers in time for submitting SOC codes for Q4 2022. As always, we encourage electronic submission of wage information.

■ 7. Where do I enter SOC codes in EAMS (Employer Account Management Services)?

Answer: EAMS does not support entry of SOC codes. Before SOC codes become mandatory, EAMS customers will be migrated to our upgraded EAMS system, which supports SOC code reporting.

Frequently asked questions

■ 8. Do I have to report SOC codes for exempt employees?

Answer: If your employees' wages are exempt from being reported on quarterly tax and wage reports, you do not need to report SOC codes. This includes corporate officers, sole proprietors, commission-only sales, retirement pay and more. For more information, go to esd.wa.gov/employer-taxes/exempted-employees.

Frequently asked questions

■ 9. I'm getting error messages about not reporting SOC codes when I file. What's going on?

Answer: This is only a warning message that appears to let you know that you didn't report SOC codes. You can still complete and submit your tax report.

■ 10. How do I add SOC codes with keyed wage data?

Answer: For more info, go to esd.wa.gov/employer-taxes/about-soc.

Frequently asked questions

■ 11. How do I add SOC codes with imported wage data?

Answer: For more info, go to esd.wa.gov/employer-taxes/importing-wage-files-new-EAMS.

Frequently asked questions

12. How will ESD validate SOC code data?

Answer: The system won't allow you to enter an invalid or incomplete SOC code.

We're looking to the employer community to provide accurate SOC code data to ensure:

- Our educational institutions provide effective training.
- Our businesses can help shape courses that lead to actual jobs.
- Economic developers identify strengths in local workforces to help attract businesses to those communities.

Frequently asked questions

13. What does entering SOC codes look like?

Answer: You can watch a full instructional video on our website, esd.wa.gov/employer-taxes/about-soc.

Wage Detail

1st quarter 2022 (January 1 - March 31)

Errors and Warnings

⚠ row number 1: SOC codes will be required starting with your fourth quarter 2022 tax report. You will not be charged a penalty at this time if you do not provide a SOC code.
