

## Unemployment Insurance Trust Fund Forecast September 2016

## **Executive summary**

This report provides the status and updated projections of the state's unemployment insurance trust fund for 2015 through 2022.

Over the past 10 years, Washington's governor and legislature have worked together in a bipartisan manner to develop a stable unemployment insurance tax and benefit system to sustain the state through difficult economic times. Because of this, Washington's trust fund remained solvent while 36 other states exhausted their trust funds and were forced to secure loans from the federal government to maintain unemployment insurance benefits. And Washington's average unemployment tax rate dropped from 2nd-highest in the nation at the end of June 2007 to 24th-highest at the end of June 2016.

#### **Contents**

This report contains the following items:

- Employer contributions, benefit payments and projected trust fund balance through 2022;
- September 2016 forecast compared to the June 2016 forecast;
- *Appendix 1*: Economic assumptions for the September 2016 forecast compared to the June 2016 forecast; and
- Appendix 2: States with outstanding loans from the Federal Unemployment Account.

If you have any questions or concerns, please contact Cynthia L. Forland, Director, Labor Market and Performance Analysis at 360-407-4503 or at <a href="mailto:cforland@esd.wa.gov">cforland@esd.wa.gov</a>.

#### Introduction

This report provides information on Washington state's employer contributions, benefits and unemployment trust fund current and projected balances. The Employment Security Department's unemployment trust fund projections are reviewed and adjusted several times a year. The adjustments are made by changing several variables in the trust fund model, which are derived from the state's Economic and Revenue Forecast Council's (ERFC) quarterly economic forecast, IHS Global Insight and updated unemployment insurance recipiency rates, and by replacing forecasted data with the most current actual data.

This forecast uses the September 2016 ERFC, September 2016 IHS Global Insight assumptions and actual unemployment insurance tax and benefit data through June 30, 2016. The economic assumptions used for this forecast and the June 2016 forecast are provided in *Appendix 1*.

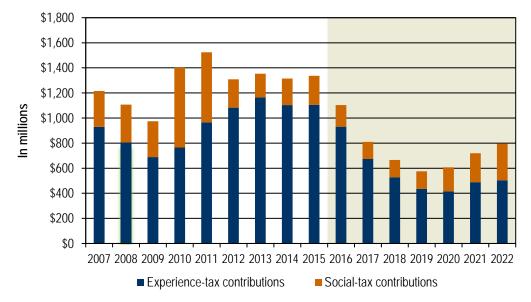

## **Employer contributions**

Employer contributions were about \$1.34 billion in 2015 and are projected to be approximately \$1.10 billion in 2016. Employer taxes are projected to decrease in 2016, continue declining through 2019 and then gradually increase through 2022. We are seeing this decrease as we get further from the recent recession because each year's experience-rated taxes are based on employers' benefit payments of the previous four years.

Figure 1 shows projected annual employer experience tax and social tax contributions through the end of 2022.

**Figure 1.** Washington state unemployment insurance employer tax contributions Washington state, 2007 through 2022

Source: Employment Security Department/LMPA/ETA 2112/UI Wage File

Note: Highlighted years reflect projected data.

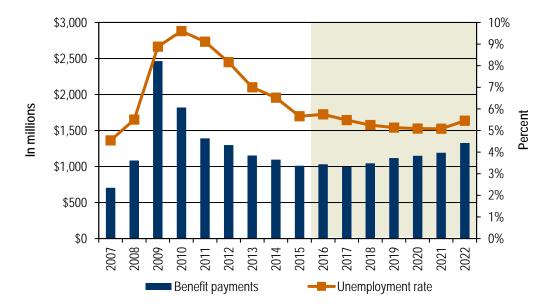

Employer tax contributions were about \$1.34 billion in 2015 and are projected to be approximately \$1.10 billion in 2016.

## Unemployment benefit payments

Benefit payments from the unemployment trust fund were approximately \$1.01 billion in 2015 and are projected to be approximately \$1.03 billion in 2016. *Figure 2* shows annual projections of benefit payments from the trust fund and the projected state unemployment rate through 2022. Federally funded benefits such as emergency unemployment compensation (EUC) and extended benefits are excluded from *Figure 2*.

**Figure 2**. Benefit payments from state unemployment trust fund Washington state, 2007 through 2022

Source: Employment Security Department/LMPA/ETA 2112/UI Wage File

Note: Highlighted years reflect projected data.

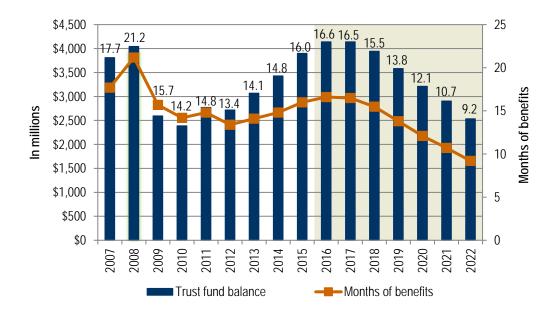

Benefit payments from the trust fund were approximately \$1.01 billion in 2015 and are projected to be approximately \$1.03 billion in 2016.

#### Trust fund balance

As of September 30, 2016, Washington state had \$4.13 billion (approximately 16.8 months of benefits) in the unemployment trust fund.

Figure 3 below shows the annual projected year-end trust fund balance through 2022. The solid orange line represents the months of benefits available on the date when unemployment insurance tax rates for the following year are calculated (September 30). It is important to note that individual years can have the same trust fund balance, but different months of benefits. There is not one standard cost for a month of benefits; this is seen in Figure 3 below where 2018 is projected to have fewer months of benefits but a higher trust fund balance than 2015. The cost of a month of benefits varies depending on how many people in the state are working and how much they are earning.

**Figure 3.** Washington state unemployment trust fund and months of benefits Washington state, 2007 through 2022 Source: Employment Security Department/LMPA/ETA 2112/UI Wage File

Note: Highlighted years reflect projected data.

The trust fund balance was at 16.0 months of benefits in 2015 and is projected to reach a peak of 16.6 months of benefits in 2016.

## Trust fund scenario: September 2016 forecast compared to June 2016

This scenario compares the September 2016 forecast (top) to the published June 2016 forecast (bottom).

Note: The total average tax rate cannot be reached by adding the average experience-tax rate and the flat social-tax rate due to social-tax caps and other factors.

## Appendix 1: Economic assumptions

The events since the last forecast have made little impact toward the state's Economic and Revenue Forecast Council's outlook for the future. Overall, revisions to the current economic forecast call for a slightly less optimistic outlook.

The Employment Security Department's unemployment trust fund projections are reviewed and adjusted several times a year. The adjustments are made by changing several variables in the trust fund model, which are derived from the Economic and Revenue Forecast Council's quarterly economic forecast, IHS Global Insight and updated unemployment insurance recipiency rates, and by replacing forecasted data with the most current actual data. *Appendix figure A-1* shows the major economic inputs used in the trust fund model with a comparison to the prior forecast.

Appendix figure A-1. Washington state economic and revenue projections

Washington state, September 2016 and June 2015

2021	2.33%	2.30%		
2022	2.57%	2.55%		

#### **Definitions of economic variables:**

- Unemployment rate: The rate computed by dividing total unemployed by the civilian labor force. The unemployment rate is used as an input into the forecasting of benefits. These unemployment rates are seasonally adjusted. Seasonal adjustment smoothes out the impact of normal seasonal patterns that occur year after year, such as strong seasonal hiring in retail trade around the holidays.
- Wage and salary disbursements: This component of personal income consists of the
  monetary remuneration of employees. It reflects the amount of wages and salaries
  disbursed, but not necessarily earned, during the year. This component is
  measured before deductions, such as Social Security contributions and union dues.
  The percentage growth for wage and salary disbursements is used in projecting
  future wages.
- **Employment growth:** The percentage change in overall employment from year to year. Employment growth is used in the trust fund model as a means of forecasting total employment.
- Consumer Price Index (CPI): A measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. CPI is used in the forecast as a means of adjusting the dollar values.

# Appendix 2: States with outstanding loans from the Federal Unemployment Account

A total of 36 states/territories have exhausted their trust funds and secured loans from the Federal Unemployment Account during this recession. At their peak, those loans exceeded \$47 billion. Currently, one of these states and one territory continue to have outstanding federal loans. The amount recently borrowed or repaid is listed under "Change since" in the table below.

**Appendix figure A2-1**. Outstanding loans from the Federal Unemployment Account United States, September 8, 2016
