Introduction

Each year, the Employment Security Department's Labor Market and Economic Analysis branch compiles Washington state occupational employment and wage estimates. The data are presented statewide, by Metropolitan Statistical Areas, Metropolitan Divisions and by balance of state areas. All data in this publication are at the cross-industry level.

Occupational Employment Statistics (OES) is a program of the U.S. Department of Labor, Bureau of Labor Statistics. This federal-state cooperative program produces employment and wage estimates for more than 800 occupations. National estimates, state estimates and more information about the program are available online at www.bls.gov/oes.

Notes on estimates

The occupational employment and wage estimates presented here are based on the spring 2010 Occupational Employment Statistics survey of more than 4,800 employers. Data from the current survey were combined with the fall 2007, spring 2008, fall 2008, spring 2009 and fall 2009 survey panels to create a sample size of over 27,000 employers. Wage estimates were updated to a March 2011 level using Employment Cost Index (ECI) factors. Employment estimates are benchmarked to an average of November 2009 and May 2010 employment.

Information about occupations collected in the survey was categorized using the revised 2010 Standard Occupational Classification (SOC) system. The revised SOC codes were put into practice in the fall of 2009. Until three years of data are collected under the new system, some transitional codes are being used. For job definitions and other information about the SOC coding system, go to www.bls.gov/soc.

Occupation and wage estimates are not provided for farms, self-employed persons, owner/partners in unincorporated firms, the military, household workers or unpaid family workers. Estimates for some occupations or wage levels are not listed due to small sample size. These include occupations with an estimated employment of fewer than 10 people.

Definitions

25th Percentile – Twenty five percent of all workers earn below the wage rate specified.

50th Percentile – Fifty percent of all workers earn below the wage rate specified. This is also called median wage.

75th Percentile – Seventy five percent of all workers earn below the wage rate specified.

Annual wage – In instances where hourly wages are reported, the annual wage is calculated by multiplying the hourly wage by 2,080 hours. This is the annual equivalent of working 40 hours each week. Annual wages are calculated as full-time.

Average wage – The sum of all reported wage rates divided by the number of rates.

Balance of state area (BOS) – One of four groups of counties in Washington not included in metropolitan statistical areas. The county groups are considered to be economically related.

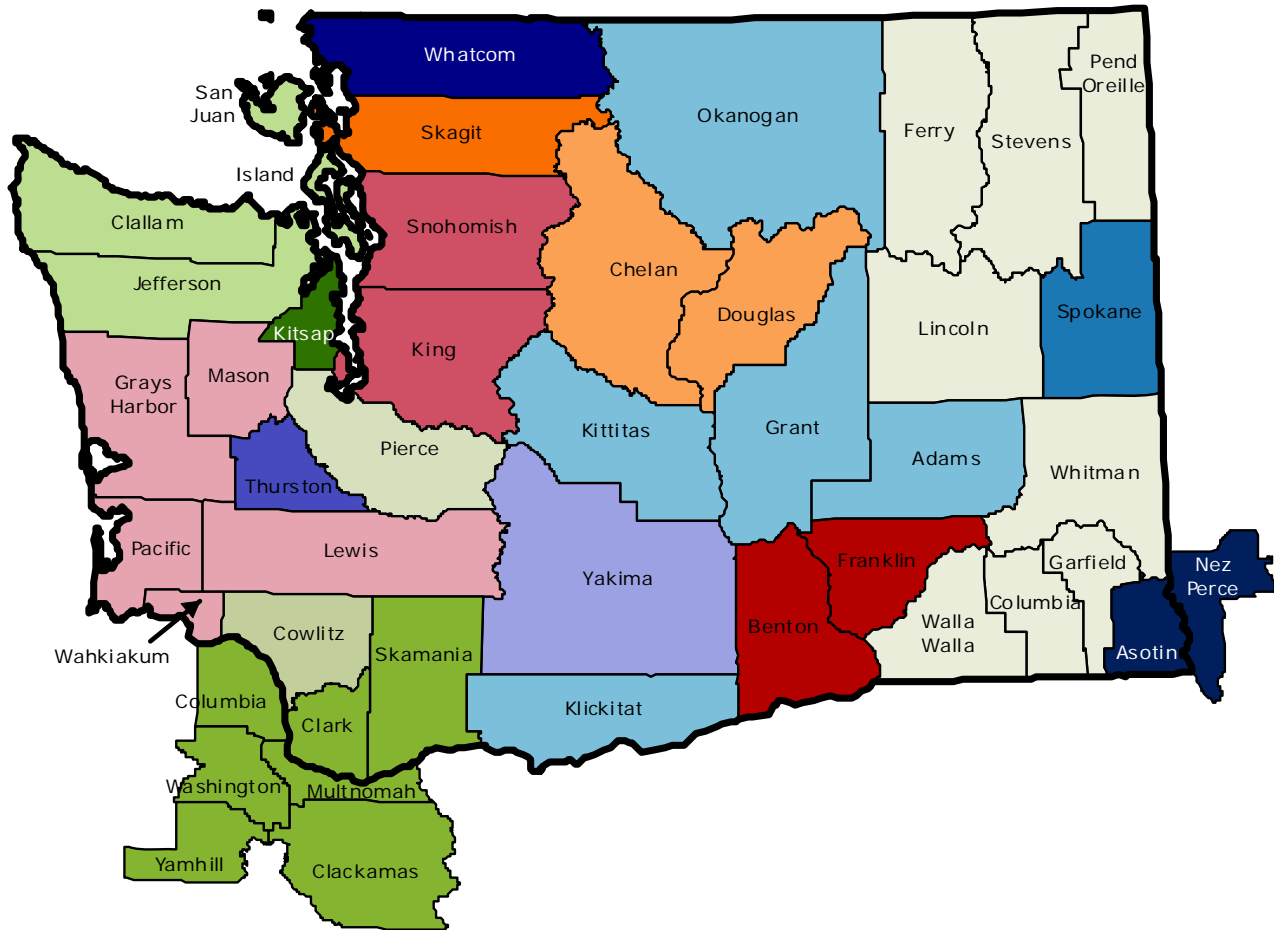

Employment cost index (ECI) – The employment cost index measures changes in wages, salaries and benefits for civilian workers. This includes private industry and state and local government. The ECI is published by the U.S. Bureau of Labor Statistics and can be found online at stats.bls.gov/ncs/ect.

Metropolitan Division (MD) – A county or group of counties that serve as a distinct employment region within a metropolitan statistical area that has a population of at least 2.5 million.

Metropolitan Statistical Area (MSA) – A county or group of counties that are economically related having a principal city or urbanized area with a population of at least 50,000 people. A MSA may include contiguous counties from neighboring states. This is also called a metro area.

Standard Occupational Classification (SOC) – The SOC system is used to sort and define more than 800 occupations. The standardized system allows comparable research and reporting by individual states and the federal government. For more information on the SOC system, go to www.bls.gov/soc.
